Serendipity Rose*

Rosa 'Serendipity'

Height: 4 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 4a

Group/Class: Shrub Rose

Description:

A lovely, elegant variety with semi-double peach blooms; perfect for the garden, along walks, or an informal hedge; all roses need full sun and well-drained soil

Ornamental Features

Serendipity Rose features showy lightly-scented semi-double peach flowers at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Serendipity Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Serendipity Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Serendipity Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.
