Foxfire Tropical Water Lily*

Nymphaea 'Foxfire'

Height: 14 inches

Spread: 6 feet

Sunlight: ○ ●

Hardiness Zone: 4b

Other Names: Waterlily

Description:

Tropical water lily with extraordinary lavender and pink star-shaped flowers with golden centers; blooms from summer to winter; round variegated foliage is burgundy and deep green; easy to care for; dislikes moving water; annual in colder climates

Ornamental Features

Foxfire Tropical Water Lily features showy fragrant double lavender cup-shaped flowers with pink overtones and yellow eyes at the ends of the stems from early summer to late fall. The flowers are excellent for cutting. Its attractive glossy oval leaves remain burgundy in color with distinctive green spots throughout the year.

Landscape Attributes

Foxfire Tropical Water Lily is an herbaceous evergreen perennial with a ground-hugging habit of growth. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. It has no significant negative characteristics.

Foxfire Tropical Water Lily is recommended for the following landscape applications;

- Water Gardens
- Naturalizing And Woodland Gardens
- Container Planting
- Bog Gardens

Planting & Growing

Foxfire Tropical Water Lily will grow to be about 12 inches tall at maturity, with a spread of 6 feet. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It is an excellent choice for very wet locations or locations with some standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Foxfire Tropical Water Lily is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
