SPECIALTY GARDEN CENTER

Bull's Eye Tropical Water Lily*

Nymphaea 'Bull's Eye'

Height: 12 inches

Spread: 6 feet

Sunlight: ☉ ●

Hardiness Zone: (annual)

Other Names: Waterlily

Description:

Tropical water lily with spectacular hot pink star-shaped flowers with yellow centers; blooms from summer to winter; large round green foliage; easy to care for; water lilies dislike moving water; annual in colder climates

Ornamental Features

Bull's Eye Tropical Water Lily features showy fragrant hot pink cup-shaped flowers with yellow eyes at the ends of the stems from early summer to late fall. The flowers are excellent for cutting. Its attractive large glossy round leaves remain green in color throughout the year.

Landscape Attributes

Bull's Eye Tropical Water Lily is an herbaceous annual with a ground-hugging habit of growth. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. It has no significant negative characteristics.

Bull's Eye Tropical Water Lily is recommended for the following landscape applications;

- Water Gardens
- Naturalizing And Woodland Gardens
- Container Planting
- Bog Gardens

Planting & Growing

Bull's Eye Tropical Water Lily will grow to be about 10 inches tall at maturity, with a spread of 6 feet. Its foliage tends to remain low and dense right to the ground. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It is an excellent choice for very wet locations or locations with some standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Bull's Eye Tropical Water Lily is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
